1 Dangerous Waters guide

1.1 Plot

Dangerous Waters is a game set in the Medieval Era. You are the captain of a ship that is travelling thru the dangerous seas. You have to defend it from the attacks of pirates in order to achieve victory.

1.2 Commands

Use the arrow keys to move your ship. The up and down keys change the speed of the ship, making it move forward or backward. The left and right keys make the ship rotate, counterclockwise and clockwise, respectively.

The Enter key will start the game and pause when needed.

1.3 When you Lose

The enemy ships will try to kill you chasing you. If they touch you, the pirates can board your ship and you lose.

1.4 When you win

To win you have to survive the waves of pirates

2 Support

2.1 Documentation

The documentation for the code of Dangerous Waters is provided in the game folder. In there you will find the comments for the functions, variables and structures of the code and brief explanations of functionality.
